ASSIGNMENT 7

Topic

In this study, the communication of processors with peripherals will be the subject.

Phase 1

Give a taxonomy of communication styles and briefly explain the working principle and feature. Show them on a comparative table.

Phase 2

After searching and finding all the technical topics you have found, write your own comments and understandings and information about them briefly and concisely.

Phase 3

Investigate in what units companies pack these communication styles.

Phase 4

Perform in proteus application using two technologies of your choice.

Submit your work file by attaching it to your report.
